EXECUTIVE SUMMARY

THE 2005 ARMY LEISURE NEEDS SURVEY

The Army Leisure Needs Survey (LNS), which assesses patron need for and satisfaction with Morale, Welfare, and Recreation (MWR) programs, has been conducted triennially Army-wide since 1992. The main product of the 2005 Leisure Needs Survey (LNS) is a comprehensive installation report of survey results. The report is a standardized, automated, electronic document that provides information on each installation's responses to the Leisure Needs Survey.

Questions in the LNS cover individual and family background, facility use and perceived quality of MWR programs and facilities, leisure activity preferences and participation, and perceptions of the impact and importance of MWR in enhancing the quality of Army life. Installation Points of Contact (IPOCs) assisted with the tailoring of the survey instrument to accommodate installation specific issues.

CONDUCT OF THE SURVEY

The 2005 Leisure Needs Survey was conducted by Caliber, an ICF Consulting Company, at 92 Army installations: 61 CONUS and 31 OCONUS. Four key patron groups were surveyed at each installation: active duty military, spouses of active duty military, civilian employees, and retired military.* All respondents had a choice of completing the 16 page optically scannable paper version of the LNS, or for the first time, completing the LNS on the World Wide Web.

SURVEY RESULTS

Key survey results have been selected for this summary to present patrons' needs for and satisfaction with MWR facilities and their perceptions of the quality of the MWR facilities at your installation. Results in this summary are presented as follows:

- MWR programs and services
- Leisure activities
- Feeling that the Army cares about its people as a result of MWR
- MWR during deployment
- Career intentions.

The 2005 Leisure Needs Survey was administered from April through July 2005. The overall response rate for Fort Campbell was 16.3%.

* Retirees and spouses were not surveyed at OCONUS installations.

All data aggregated across patron groups presented in this report have been weighted by patron group (active duty, spouses of active duty, civilians and retirees) to adjust the relative contribution of each patron group's responses to the total group of respondents. This weighting corrects for response bias by adjusting the size of each of the four samples to what they would be if each patron group was exactly in the same proportion as exists in your installation population. When looking at the Total Cases column in the report exhibits, please remember that active duty, spouses of active duty, Department of Army civilians and Department of Army retirees are included in the Total Cases percentages in the same proportion as they exist in the population at your installation.

Where appropriate, comparisons are made between installation specific data and Army baseline data. The Army baseline data are an aggregate from all respondents who completed the Leisure Needs Survey in 2005 for a total of 92 installations and 50,651 respondents.

MWR PROGRAMS AND SERVICES

Respondents were asked to indicate their opinion on which seven of 25 standard Army MWR facilities are most important to have on an Army installation. The table below presents the seven "most important" facilities for all respondents and for each of the four patron groups at your installation.

MOST IMPORTANT MWR PROGRAMS AND SERVICES

Active Duty:

- 1) Fitness Center/Gym
- 2) Army Lodging
- 3) Library
- 4) Athletic Fields
- 5) Child Development Ctr.
- 6) Swimming Pool
- 7) BOSS

Civilians:

- 1) Army Lodging
- 2) Library
- 3) Fitness Center/Gym
- 4) Child Development Ctr.
- 5) Youth Center
- 6) ITR Office
- 7) Swimming Pool

All Respondents:

- 1) Fitness Center/Gym
- 2) Army Lodging
- 3) Library
- 4) Child Development Ctr.
- 5) Swimming Pool
- 6) Athletic Fields
- 7) Youth Center

Spouses:

- 1) Library
- 2) Child Development Ctr.
- 3) Army Lodging
- 4) Youth Center
- 5) Fitness Center/Gym
- 6) School Age Services
- 7) Swimming Pool

Retirees:

- 1) Army Lodging
- 2) Library
- 3) Fitness Center/Gym
- 4) Child Development Ctr.
- 5) Youth Center
- 6) ITR Office
- 7) School Age Services

Respondents were asked to indicate all sources through which they hear about MWR events and activities offered at your installation. The exhibit below presents the percentage of respondents in each patron group who chose each source, as well as the total percentage of respondents who chose each source (presented in the column marked “Total Cases”). Columns will not sum to 100% since respondents could mark multiple sources. The sources are listed in the order they appear in the Leisure Needs Survey.

SOURCES OF MWR INFORMATION

	Active Duty (n = 113) %	Spouses (n = 176) %	Civilians (n = 193) %	Retirees (n = 139) %	Total Cases (n = 621) %
Internet	10%	23%	21%	17%	13%
E-mail	15%	32%	37%	17%	20%
Friends and Neighbors	25%	51%	28%	35%	29%
Family Readiness Groups (FRGs)	19%	44%	6%	2%	21%
Bulletin boards on post	47%	24%	32%	18%	41%
Post newspaper	23%	63%	54%	53%	33%
MWR publications	26%	30%	37%	26%	28%
Radio	12%	9%	19%	21%	13%
Television	10%	14%	14%	17%	11%
My child(ren) let(s) me know	1%	9%	0%	1%	2%
Other unit members or co-workers	26%	15%	30%	12%	24%
Unit or post commander or supervisor	21%	7%	11%	3%	18%
Marquees/billboards	9%	14%	20%	17%	11%
Flyers	35%	32%	37%	29%	34%
Other	8%	10%	9%	12%	8%
I never hear anything	12%	3%	6%	14%	10%

Respondents were asked to indicate their usage of, overall satisfaction with, and perceived quality of up to 25 standard MWR facilities and programs at your installation. In the exhibit below, the usage rates for each of the facilities and programs are presented, along with the rating of overall satisfaction with a facility/program, and the average rating of the facility's quality. Satisfaction ratings were based on a 5-point scale with 1 representing very low satisfaction and 5 representing very high satisfaction. Quality ratings were based on a 5-point scale with 1 representing very poor quality and 5 representing very good quality. The quality ratings are the average of a respondent's quality rating for each facility's building, equipment, and personnel. The satisfaction and quality ratings reflect the perceptions only of those respondents who indicated that they used the facility. The facilities are presented in descending rank order of percent usage.

<p align="center">INSTALLATION FACILITY USAGE RATES, SATISFACTION RATINGS, AND QUALITY RATINGS*</p>
--

Facility	Usage Rates	Satisfaction Ratings	Quality Ratings
Fitness Center/Gym	66%	4.35	4.24
Library	42%	4.34	4.35
Swimming Pool	37%	4.08	3.92
Bowling Center	34%	4.56	4.33
Bowling Food & Beverage	28%	4.46	4.36
Athletic Fields	23%	4.34	4.16
Recreation/Community Activity Center	20%	4.24	4.22
Post Picnic Area	20%	4.14	4.00
Army Lodging	15%	4.38	4.26
Multipurpose Sports/Tennis Courts	14%	3.83	3.92
Automotive Skills	14%	4.27	4.16
ITR - Commercial Travel Agency	13%	4.29	4.14

Cabins & Campgrounds	3%	4.64	4.33

*Facilities ordered from high to low by Usage Rates.

LEISURE ACTIVITIES

Respondents were given a comprehensive list of 91 leisure activities from which to indicate the extent of their participation. These data are the primary measurement of the community's leisure preferences. The table below presents the top ten activities for all respondents at your installation, regardless of where they participated: on post, off post, or at home.

TOP TEN LEISURE ACTIVITIES

Activity	Total Respondents n	Overall Participation %
Watching TV/DVDs	225	54%
Movie theaters	169	48%
Entertaining at home	297	43%
Internet applications	278	42%
Weight training	97	37%
Cardio equipment	127	35%
Running/jogging	74	33%
Library Internet	138	33%
Special family events	224	29%
Bowling	111	28%

The 91 leisure activities have been categorized into distinct areas that correspond to MWR functions. The table below presents the top five leisure activities for all respondents at your installation for each of six categories. Also shown in this table are the percentages of respondents participating on post and off post. The activities in each category are ranked by the percentage of on-post participation.

TOP LEISURE ACTIVITIES BY CATEGORY

Team Sports Activities					Sports and Fitness Activities

FEELING THAT THE ARMY CARES ABOUT ITS PEOPLE AS A RESULT OF MWR

In four survey questions, respondents were asked about the extent to which they feel that Army Child and Youth Services (ACYS), Better Opportunities for Single Soldiers (BOSS), Army Community Service (ACS) and MWR programs and services demonstrate that the Army cares about its people. Responses for active duty and spouses of active duty at your installation are shown below.

MWR PROGRAM/SERVICE...	...GENERATES A POSITIVE* FEELING THAT ARMY CARES ABOUT ITS PEOPLE.	
	ACTIVE DUTY	SPOUSES OF ACTIVE DUTY
Army Child and Youth Services	83%	92%
Better Opportunities for Single Soldiers	44%	N/A
Army Community Service	50%	58%
MWR Program and Services	76%	86%

* Positive = moderate, great or very great extent

MWR DURING DEPLOYMENT

Active duty and spouses of active duty who experienced a deployment during the 12-month period prior to taking the LNS were asked about the importance of access to MWR programs and services during deployment. These data are presented below.

IMPORTANCE OF ACCESS TO MWR DURING DEPLOYMENT

CAREER INTENTIONS

Active duty were asked about their intentions to make the military a career. Spouses of active duty were asked about their desire for their sponsor to make the military a career. The exhibits below present these data for your installation.

Current Plans About Making the Military Your Career	ACTIVE DUTY
Definitely will make military a career	26%
Probably will make military a career	13%
Undecided	27%
Probably will not make military a career	9%
Definitely will not make military a career	25%

Do You Want Your Spouse to Make the Military His/Her Career?	SPOUSES OF ACTIVE DUTY
No	8%
Not Sure	26%
Yes	66%

CONCLUSIONS

Through its MWR programs and services, the Army strives to meet the recreation and leisure needs of each of the patron groups identified in this report. Because of the diversity of patron groups, installations and available resources, this task can be extremely challenging. The information presented in this summary is a starting point for identifying potential recreation and leisure opportunities and priorities at your installation. The remainder of the information contained in this report should be reviewed and studied in detail to formulate MWR business plans, to identify specific leisure and recreation needs and issues, and to enhance delivery of MWR services at your installation.

SECTION ONE INTRODUCTION

THE 2005 ARMY LEISURE NEEDS SURVEY

The main product of the 2005 Leisure Needs Survey (LNS) is this comprehensive installation report of survey results. The report is a standardized, automated, electronic document that provides information on your installation's responses to the Leisure Needs Survey.

Questions in the Leisure Needs Survey cover individual and family background, facilities use and perceived quality of MWR programs and facilities, leisure activity preferences and participation, and perceptions of the impact and importance of MWR in enhancing the quality of Army life. Each Installation Point of Contact (IPOC) assisted with the tailoring of the survey instrument to accommodate installation specific issues.

The 2005 Leisure Needs Survey was conducted by Caliber, an ICF Consulting Company, at 92 Army installations: 61 CONUS and 31 OCONUS. All respondents had a choice of completing the 16 page optically scanable paper version of the LNS, or for the first time, completing the LNS on the World Wide Web.

SURVEY SAMPLING AND ADMINISTRATION

Surveys were sent to four key patron groups at each installation: active duty military, spouses of active duty military, civilian employees, and retired military.¹ Population information collected by the Army Community and Family Support Center (CFSC) from each installation was sent to Caliber from which to draw random samples for each of the four patron groups.

To determine the total number of surveys that would be distributed for each patron group, the size of each patron group sample was adjusted to account for the historical average response rate of 30% for the Leisure Needs Survey. If the calculated number of surveys to be distributed was larger than the installation population of a patron group, then the entire patron population was surveyed. If the calculated number of surveys to be distributed was less than the installation population, then Caliber selected a random sample for that patron group. Random selection increases the likelihood that a sample is representative of a patron population at the installation.

Recommended survey distribution methods for each of the four patron groups were outlined by Caliber in the Survey Implementation Guide sent to the 92 Army installations in February of 2005. Hard copy surveys were distributed to active duty and civilians at the

¹ Retirees and spouses were not surveyed at OCONUS installations.

workplace by the IPOCs; retirees and spouses of active duty members received hard copy surveys by direct mail to their home addresses. Surveys were distributed in April of 2005. Completed paper surveys from active duty and civilians were collected by each IPOC and returned to Caliber for optical scanning. Paper surveys from spouses and retirees were returned directly to Caliber through Business Reply Mail. Surveys completed via the Web were captured and stored at Caliber through electronic submission.

ACTIVE DUTY AND DA CIVILIAN SAMPLING: UNIQUE CONSIDERATIONS

Early in the 2005 LNS sample selection process, it became apparent that random sampling of active duty members and DA civilians would not be practical for many installations. Among the reasons were:

- A number of population mailing lists that Caliber received from individual installations were not useable due to incomplete address information, preventing the selection of a random sample from these populations.
- Several installations had units deployed in connection with Operation Iraqi Freedom (OIF), resulting in the active duty populations at these installations being significantly reduced.

As a result of these situations, Caliber developed alternate sampling plans for active duty and DA civilians that attempted to maintain the representativeness of these samples for each installation, while addressing the issues presented above. The sampling solutions for these two patron groups comprised the following components:

1. For installations with useable mailing lists, and that wanted to use those lists, Caliber drew random samples of respondents for active duty members and civilians from those lists. Using this process, Caliber randomly sampled active duty Soldiers from thirty-six installations, and randomly sampled DA civilians from eighteen installations. These installations are identified in Exhibit 1-1 below by the phrase “By-Name Random” under the “Active Duty” and “Civilian” headers.
2. For installations whose mailing lists were not useable or in instances where IPOCs requested unaddressed survey packets, the following distribution methods were employed for active duty members, and/or DA civilians:
 - a. **Active Duty.** The surveys intended for active duty members were divided into four groups: Junior Enlisted, Senior Enlisted, Junior Officer, and Senior Officer. The number selected for each group was proportional to the number in the population of that group at the installation. IPOCs were instructed to distribute the surveys labeled “Junior Enlisted”, “Senior Enlisted”, “Junior Officer”, and “Senior Officer” to anyone in that rank group and to do this as randomly as possible. These installations are identified in Exhibit 1-1 by the phrase “Rank Group” under the “Active Duty” header.

- b. **DA Civilians.** The requisite number of Survey Packets designated for civilians was prepared with a label of “Civilian” and the installation name. IPOCs were asked to distribute these survey packets among DA civilians as randomly as possible. These installations are identified in Exhibit 1-1 by the phrase “Unlabeled” under the “Civilian” header.

It is assumed that the IPOCs distributed the surveys as instructed for these two patron groups in these unique situations.

Exhibit 1-1 shows the LNS sampling method used for each patron group at each installation.

* **By-Name Random** denotes surveys with labels addressing them to specific individuals randomly sampled from mailing lists provided by the IPOCs or the Defense Manpower Data Center (DMDC). **Rank Group** denotes labels for one of four rank groups: Junior Enlisted, Senior Enlisted, Junior Officer, and Senior Officer. **Unlabeled** denotes surveys with only the word "Civilian" on the label.

DIFFERENCES BETWEEN RANDOM AND SELF-SELECTED SAMPLES

Toward the end of the original data collection period, 31 March 2005 through 31 May 2005, LNS response rates had not reached the desired targets. CFSC extended the administration period to 17 June 2005 to allow IPOCs more time to collect the surveys at their installations.

With the LNS responses remaining low at many installations on 17 June 2005, CFSC once again extended the administration period to 8 July 2005. During this extension, the LNS was made available via the Web to all members of each of the patron populations at the 92 installations. An additional 3,311 respondents self-selected to complete the LNS during this extension.

By making the Web survey available to all members of each of the patron groups, none of the patron group samples is the result of pure random selection. Of concern is whether the self-selected respondents differ in any substantial ways from those who did not self-select (i.e., those randomly selected). To determine any differences, the participants who took the survey on the web were partitioned into two groups: those who self-selected during the extension periods and those who were randomly selected for the initial sample. The two groups were examined for any sizable differences in the following demographics:

- Gender
- Age
- Education level
- Racial/ethnic background
- Marital status
- Rank/grade.

The results of the comparisons showed no differences between the two groups in gender, education level, marital status, or racial/ethnic background. The groups did differ in the following two areas: age and status. The self-selected respondents tend to be slightly younger: 39 years of age versus 42 years for randomly selected respondents, and as a result, also tend to be in lower ranks/grades than the randomly selected respondents.

The self-selected respondents have higher proportions of active duty and civilian than the randomly selected samples as shown in Exhibit 1-2 below.

Exhibit 1-2: Randomly Selected Versus Self-Selected LNS Samples				
Selection Type	Status			
	Active Duty	Civilian	Spouse	Retiree
By-Name Randomly Selected	28.9%	32.7%	18.7%	19.7%
Self-Selected	43.4%	36.6%	9.8%	9.4%

This status difference likely reflects the emphasis placed by the IPOCs on getting more active duty and civilians to take the LNS on the Web when the survey was opened to all members of each patron group.

The 3,311 self-selecting LNS respondents constitute approximately 6% of the total number of hardcopy and Web survey respondents. Because this is such a small percentage of the total respondents, even with differences in age and status, it was concluded that the self-selected sample is not different enough to impact the patron group samples for the 2005 LNS.

RESPONSE RATES

The number of surveys distributed, response rates and confidence intervals for each of the patron groups surveyed at your installation are presented below in Exhibit 1-3.

Exhibit 1-3: Fort Campbell LNS Response Rates and Confidence Intervals						
Patron Group	Installation Population	Desired Sample	Surveys Distributed	Surveys Returned	Response Rate	Confidence Interval
Active Duty	24288	381	1269	120	9.46%	8.92%
Spouses	4458	419	1396	181	12.97%	7.13%
Civilians	3933	249	830	202	24.34%	6.72%
Retirees	616	176	586	162	27.65%	6.61%
Total	33295	1224	4081	665	16.30%	3.76%

The first column in the exhibit lists the patron groups surveyed at your installation. The second column presents the population count at your installation for each of these patron groups. The active duty and civilian population counts were provided by the IPOCs at the beginning of the 2005 LNS. The spouse and retiree population counts were derived from information provided by the Defense Manpower Data Center. The third column, **Desired Sample**, lists the number of completed surveys needed to achieve the desired 95% \pm 5% confidence interval for each patron group. The fourth column, **Surveys Distributed**, lists the number of surveys that were distributed in order to achieve the desired sample. The number of **Surveys Distributed** takes into account the historical average LNS response rate of 30%. Distributing about three times as many surveys as the desired sample facilitates achieving the desired final sample for each patron group.

The fifth column, **Surveys Returned**, shows the number of surveys received from each patron group at your installation. The total number of surveys returned may exceed the sum of the four patron group samples if any respondents failed to indicate their patron group status on the survey. The sixth column, **Response Rate**, is based on the number of **Surveys Returned** divided by the number of **Surveys Distributed**. Low response rates, such as those less than 20%, increase the chances that one or more subgroups (e.g., an active duty rank, a civilian grade) may be under- or over-represented in the sample. Data from patron groups with low response rates should be interpreted with caution. Please note that if the number of surveys returned from the patron group was too low to report in the findings (i.e., < 15), the patron group was excluded from the report.

Finally, the seventh column, **Confidence Interval**, presents the interval for a sample response to an answered question within which we are likely to find the true population response with a 95% degree of reliability.

PATRON GROUP SAMPLES AND CONFIDENCE IN THE DATA

Assume you obtained a **Desired Sample** size of 300 survey returns for your active duty patron group. Of the 300 active duty who responded, 52% said that they used the gym in the last year. The **Confidence Interval** tells us that there is a 95% $\pm 5\%$ chance that the total proportion of active duty members at your installation who used the gym last year is between 47% and 57% (i.e., 5% below 52% and 5% above 52%). If the **Population** at your installation were 1,350 active duty, then we can be 95% confident that between 634 and 770 used the gym last year.

For the common uses of these survey data by MWR managers, even samples with large **Confidence Intervals** (e.g., $\pm 15\%$) are sufficient to detect medium size differences in the data. For example, assume 58% of the active duty sample and 29% of the civilian sample stated that they used the gym. Also assume the **Confidence Interval** for active duty is $\pm 15\%$, and $\pm 10\%$ for civilians. The true **Population** usage percentage for active duty would be between 43% and 73%, while for civilians it would be between 19% and 39%. Since there is a 95% probability that the active duty percentage is above 43% and a 95% probability that the civilian percentage is below 39%, then you can confidently say that a higher percentage of the active duty **Population** than of the civilian **Population** used the gym last year.

When reviewing your findings, you should take two things into consideration. First, the confidence intervals for each of your patron groups in your total sample, which will help you assess the degree of variability in responses for each group, second, the response rate for each patron group, which will help you assess the representativeness of your patron group sample (e.g., in rank distribution, gender distribution).

WEIGHTING METHODOLOGY

In this report, overall findings (i.e., results that reflect the sum of all patron groups) are weighted by patron group to make them representative of each of the patron groups at your installation. The purpose of weighting data by patron group is to ensure that each group is represented in this report in the same proportion as it exists in your installation's total population. For example, if civilians represent 25% of your population but only 10% of your survey respondents, then the civilian survey responses are adjusted (weighted) up to 25% to ensure that their contribution to the Leisure Needs Survey data accurately reflects their proportion of the population. It is important to note that weighting by patron group does NOT change the response percentages presented for each individual patron group, but it does change the relative contribution of each patron group to the total group of respondents (seen in exhibits which present 'Total' columns).

Caution should be used when interpreting data that are weighted. Weighting does not adjust the extent to which data obtained from a particular patron group actually represent the individuals in that population. Thus, if the data for any patron group are not representative of that

patron group (e.g., in terms of rank, gender, etc.), the total weighted data will not accurately represent the total population for that group.

Exhibit 1-4 presents the patron group proportions in your installation's population, the survey sample proportions at your installation, and the weighting factor that was applied to each patron group to adjust the sample proportions to match the population proportions.

Exhibit 1-4: Fort Campbell Population Proportions, LNS Sample Proportions and Weighting Factors			
	Population Proportions	LNS Sample Proportions	Weighting Factor
Active Duty	72.95%	18.05%	4.0425
Spouses	13.39%	27.22%	0.4919
Civilians	11.81%	30.38%	0.3889
Retirees	1.85%	24.36%	0.0759

INTERPRETING YOUR DATA

Data presented in this report come from the 2005 Army MWR Leisure Needs Survey. The data have been "cleaned" to minimize erroneous responses, such as two responses where only one is acceptable. Except for minor edits, all data presented are complete and represent the responses contained within the surveys from your installation. All results are presented in exhibits with accompanying text. General guidelines for understanding all exhibits are presented in this introduction. The following topics will be discussed to assist in data interpretation:

- Group presentation
- Missing data
- Zero responses
- Limitations.

Group Presentation. The majority of exhibits in this report present data for each of the patron groups separately and for the sum of responses across groups. This method of presentation allows comparability across exhibits and provides the most effective means of targeting the critical segments of your population. In some instances, you will find that the data are presented for subgroups within a patron group or for only one patron group. The reason for presenting subgroup breakouts is to enhance the explanatory power of the data. Individual patron group responses are unweighted; 'Total Cases' are weighted to reflect your installation's population proportions. 'Total Cases' may not always add to 100% due to rounding.

Missing Data. Exhibits provide information on all persons responding to the question or questions presented in the exhibit. For example, when respondents did not complete the question on patron group status, we are unable to provide their data. When respondents did not answer a particular question (outside of intentionally skipped questions built into the survey) the data are considered missing. Thus, overall totals will differ by question and by exhibit depending on how many people answered each question.

Zero Responses. A zero value in an exhibit usually means that no respondents chose that particular option for the question or questions presented in the exhibit. For example, there may be no (zero) respondents who fall into the “<21 years old” age category. A zero, however, can also denote that a particular option is invalid. This scenario is true, for example, for retirees in this age category because it is not feasible for retirees to be less than 21 years of age.

Limitations. It is important to remember that exhibits provided in this report include only descriptive statistics. No inferential statistics are presented, meaning that claims of statistical significance cannot be made. However, you have the opportunity to calculate inferential statistics, if you desire, because you have the data set with all the data for your installation.

OUTLINE OF INSTALLATION REPORT

This report comprises four sections, including this Introduction, that provide data useful to MWR program staff, marketing directors and installation leaders. Following are the remaining three sections of the report:

- Overview Report
- MWR Facility Analysis
- MWR Activity Analysis.

Brief summaries of each of these sections follow.

Overview Report. The second section of the installation report provides the most comprehensive portrayal of survey results. These results are reported according to the LNS Conceptual Framework, explained in the introduction to that section. Included in this section are demographics and behavioral and attitudinal data as they relate to leisure activities and MWR programs and services. The overview presents a respondent profile, ranking of activity preferences by patron group and by activity group, an in-depth presentation of quality ratings for MWR programs and services, as well as installation-specific question results.

MWR Facility Analysis. This section provides detailed information on each MWR facility included in the survey. The main components of this section include (1) rankings of all installation facilities by usage rates, quality ratings, and satisfaction ratings; (2) a facility

evaluation worksheet for each facility providing information on usage, satisfaction, and quality by patron group; and (3) a customer profile worksheet for each facility providing a demographic overview of those respondents who used the facility.

MWR Activity Analysis. This section provides detailed information on the leisure activity preferences and participation rates for a variety of patron demographic groups for each leisure activity included in the survey.

At the front of the report is an **Executive Summary** that provides an abbreviated presentation of your patrons' needs for and satisfaction with MWR facilities and their perceptions of the quality of the MWR facilities at your installation. The executive summary details the impact of MWR programs and services on the quality of Army life. Also included in this summary is a list of top leisure activities in which respondents at your installation participate and information on the use of MWR programs and services during deployment.

A SUGGESTED PLAN OF ACTION

The amount of data presented in this report requires that you devise a plan for interpreting, integrating, and using the information effectively. Taking the following steps may help you in the application of your data to program enhancements.

1. **Review the report carefully.** The Executive Summary and Overview Report, should be reviewed in depth as they contain key results and detailed information on your programs. The third and fourth sections, which contain detailed information on MWR facilities and activities, will be most beneficial to program managers.
2. **Identify the significant findings from reviewing the data.** Significant findings are those about facilities and programs that are important to you and to the community at your installation. You should try to isolate those findings that you can affect by incorporating actions into an action plan. For example, some changes may be warranted in situations where program quality ratings are below average or inadequate, or where the users' satisfaction with program staff is less than expected.
3. **Develop a short list of action items.** For each finding that you identify and want to act on, prepare a "goal statement" that specifies the outcome you wish to affect, specify the target population, state the rationale, and list any additional information you may need to inform the action plan. For example, you may have:

A goal statement: Increase the participation in BOSS programs

A target population: Single Soldiers

A rationale: Participation in, and satisfaction with BOSS programs is low

Any additional information needed: Main barriers to participation

4. **Identify those aspects of the program that need to be changed.** This will help you focus on the elements of a program or offered activity that you have the power to influence. Continuing with the BOSS example, you may identify the following:

Make the BOSS activities more engaging for single Soldiers by offering a greater variety and number, based on the activities single Soldiers like to participate in as found in the LNS results.

5. **Integrate corresponding program information with the survey results.** The findings that led you to make a program modification or addition should be viewed in conjunction with available MWR program input from comment cards, customer satisfaction feedback, program evaluations, focus groups, personal observations, and program history and background.
6. **Construct an Action Plan.** At this point, you have all the information you need to construct an action plan.
7. **Execute Your Action Plan.** An action plan has no impact unless it is put into action. This is your chance!

SECTION TWO: LNS OVERVIEW REPORT

SECTION TWO LNS OVERVIEW REPORT

INTRODUCTION

The Leisure Needs Survey (LNS) assesses the use of and satisfaction with MWR programs, facilities, and leisure activities for four patron groups who use those programs and services: active duty Soldiers, spouses of active duty Soldiers, retirees, and DA civilians. For the 2005 iteration of the Survey, a conceptual framework was developed for the LNS Overview Report to meet two objectives:

- Identify a set of organizing principles to assist in the presentation of the exhibits in this section
- Provide a foundation for thinking about future iterations of the Leisure Needs Survey using programmatic constructs.

The conceptual framework for the 2005 LNS emphasizes five major program areas: MWR Programs and Facilities, Army Community Services, Child and Youth Services, Better Opportunities for Single Soldiers, and Leisure Activities. For each program area, the LNS asked the following types of questions:

- **MWR Programs and Facilities:** Questions on the frequency of use of the program or facility, satisfaction with the program or facility, the quality of the personnel associated with the program or facility, the quality of the equipment or furnishings of the program or facility, the seven most important and the seven least important MWR programs and facilities to have on an installation, experience and satisfaction with golf, bowling, and leisure travel services, and the overall quality of food and beverage services.
- **Army Community Service (ACS):** Questions on the awareness of and usage of ACS programs, the extent to which ACS programs have positive impacts on various aspects of the respondent's life and family, and any concerns respondents may have about using ACS.
- **Child and Youth Services (CYS):** Questions on the types of childcare desired, the desired programs oriented toward children and youth, and the extent to which CYS contributes to positive impacts on the life, career and family of the respondent.
- **Better Opportunities for Single Soldiers (BOSS):** Questions on the degree of program participation, and the extent to which BOSS positively impacts respondents' lives.
- **Leisure Activities:** Questions on the level of participation in various leisure activities, and whether those activities are engaged in at the installation, off post, or at home.

The six subsections of the Overview Report include

MWR Programs and Facilities: This section presents quality and satisfaction data for MWR facilities and programs, along with detailed data on golf, bowling, leisure travel, food and beverage, and entertainment. It includes information on MWR programs and facilities' effects on respondents' quality of life, respondents' sources of MWR information, and respondents' use of MWR programs and facilities during deployment.

Army Community Service (ACS): This section presents results on the awareness and perceived benefit of ACS programs, along with data on the impact of ACS programs and respondents' concerns about using ACS programs.

Child and Youth Services (CYS): This section presents a family profile of respondents and data on respondents' use of and preferences for child care. It also presents data on the positive impacts of Army CYS.

Better Opportunities for Single Soldiers (BOSS): This section presents data on chain of command support for the BOSS program, information on BOSS participants, and the impact of BOSS on single Soldiers' lives.

Leisure Activities: This section presents respondents' participation in leisure activities by frequency and location across all patron groups.

Installation Specific Facilities and Questions: This section presents quality and satisfaction data for installation-specific programs and facilities and the results of the questions that were developed specifically for your installation.

This section should be used as a starting point for determining general issues and trends among your population; it will also help guide you in examining results in the remainder of the report. Used in conjunction with the MWR Facility Analysis (found in Section Three) and the MWR Activity Analysis (found in Section Four), you will be able to gain greater insight into the successes and needed enhancements in the MWR programs and services at your installation.

MWR PROGRAMS AND FACILITIES

Satisfaction with Post Recreation Programs and Facilities

Exhibit 2-1 shows the percentage of all respondents who feel very satisfied, somewhat satisfied, neither satisfied nor dissatisfied, somewhat dissatisfied, and very dissatisfied with each MWR program/facility available at their post. Only those respondents who indicated that they had used the program/facility provided ratings of satisfaction. The programs and facilities are listed in descending order by their mean score rating. The mean score is based on a 5-point scale where 1 = very dissatisfied and 5 = very satisfied. Note that the total users will differ by program/facility as only those respondents who said they had used the program/facility rated their satisfaction with it.

Exhibit 2-1
Satisfaction with Post Recreation Programs/Facilities - All Respondents
(Survey Questions 16 and 17)

	Very Satisfied %	Somewhat Satisfied %	Neither Satisfied Nor Dissatisfied %	Somewhat Dissatisfied %	Very Dissatisfied %	Total Users n	Mean Score Rating

BOSS	38%	26%	24%	1%	11%	16	3.78

MWR PROGRAMS AND FACILITIES

Quality Ratings of Post Recreation Programs and Facilities

The next series of exhibits provides the quality ratings given by respondents for various aspects of the installation's recreation programs/facilities. Exhibits 2-2 through 2-4 provide this information for all respondents and Exhibits 2-5 through 2-7 provide this information for active duty respondents.

Respondents were asked to rate the overall quality of the building/facility/space of each MWR recreational program/facility they had used (Exhibit 2-2). Only those MWR programs/facilities that are available at their post appear in this chart. (Installation-specific facilities are not included below, as they are presented separately at the end of this section.) The facilities are listed in descending order by their mean score rating. The mean score is based on a 5-point scale where 1 = very poor and 5 = very good. Only those respondents who said they had used the facility rated its quality so total cases will differ by facility.

Exhibit 2-2
Quality of Recreation Building/Facility/Space - All Respondents
(Survey Questions 16 and 17)

	Very Good %	Good %	Adequate/ OK %	Poor %	Very Poor %	Total Users n	Mean Score Rating

MWR PROGRAMS AND FACILITIES

Quality Ratings of Post Recreation Programs and Facilities (continued)

Exhibit 2-3 shows respondents' ratings of the quality of the equipment and furnishings at each MWR facility listed below. MWR facilities are ranked by their mean score rating, which is shown in the last column on the right and is based on a 5-point scale. Only those respondents who used each program/facility rated the quality of equipment and furnishings.

Exhibit 2-3

MWR PROGRAMS AND FACILITIES

Quality Ratings of Post Recreation Programs and Facilities (continued)

Exhibit 2-4 shows respondents' ratings of the quality of each MWR program/facility personnel. MWR program/facility personnel are ranked by their mean score rating, which is shown in the last column on the right and is based on a 5-point scale. Only those respondents who used each program/facility rated the quality of the personnel.

LEISURE TRAVEL

Leisure Airline Travel Sources and Frequency of Use

Exhibit 2-13 presents the results for two questions on the survey related to leisure airline travel services use. The first question asks respondents to indicate the method they used the most to make leisure airline travel reservations during the past 12 months. The second question asks respondents to indicate the number of times they used on-post travel services for leisure airline travel during the past 12 months. The results for both questions are presented by patron group and for the total of the four patron groups.

Exhibit 2-13

LEISURE TRAVEL

Armed Forces Recreation Center Use

Exhibit 2-14 presents the results for two questions on the survey related to Armed Forces Recreation Center use. The first question asks respondents to identify which Armed Forces Recreation Centers they have visited during the past 12 months. The column percents for this question will not add to 100% since respondents could select more than one recreation center. Respondents were also asked to indicate the last time they visited an Armed Forces Recreation Center. The results for both questions are presented by patron group and for the total of the four patron groups.

FOOD AND BEVERAGE

Comparison of On-Post and Off-Post Food and Beverage Services

Survey respondents were asked to rate the overall quality of food and beverage services on post and similar facilities off post in the local community. Exhibit 2-15 presents both the mean score rating and the rating percentages that respondents gave to on-post facilities (this page) and to off-post facilities (next page). Totals for on-post/off-post residents for all subgroups are provided at the top of each exhibit. Responses are categorized within patron group according to whether respondents live on post or off post. The two parts of the exhibit can be used to compare perceptions of quality and to evaluate services across military and civilian facilities.

Exhibit 2-15

Comparison of Quality of On-Post and Off-Post Food and Beverage Services - On Post (Survey Question 20)

	Very Good %	Good %	Adequate/ OK %	Poor %	Very Poor %	Do Not Use %	Total Cases n	Mean Score Rating

FOOD AND BEVERAGE

Comparison of On-Post and Off-Post Catering Services

Survey respondents were asked to rate the overall quality of catering services on post and similar facilities off post in the local community. Exhibit 2-18 presents both the mean score rating and the rating percentages that respondents gave to on-post facilities (this page) and to off-post facilities (next page). Totals for on-post/off-post residents for all subgroups are provided at the top of each exhibit. Responses are categorized within patron group according to whether respondents live on post or off post. The two parts of the exhibit can be used to compare perceptions of quality and to evaluate services across military and civilian facilities.

MWR PROGRAMS AND QUALITY OF LIFE

MWR Program Preferences

Respondents were asked to indicate the seven most important MWR programs/activities to have on an installation. Exhibit 2-21 shows the percentage of each patron group and the total percentage across these groups that chose each MWR program as one of the seven most important to have on an installation. Programs are listed in descending order according to the ranking by active duty respondents. Programs that no one chose as most important will show 0%. Percentages may not equal 100% because respondents could choose more than one response.

MWR PROGRAMS AND QUALITY OF LIFE

Effects of Army Club Elimination on Quality of Life

Exhibit 2-23 presents respondents' perceptions of how the elimination of Army club programs would affect their quality of life. Respondents were asked to indicate if the elimination would cause a great, moderate or slight decrease in their quality of life or would have no effect. Data are presented separately for each patron group.

SOURCES OF MWR INFORMATION

Sources of MWR Information

Survey respondents were asked to identify all sources through which they hear about recreation and club events offered at their installation (Exhibit 2-25). The publicity sources are listed in descending rank order based on the "Total Cases" column, which shows the total number and percentage of respondents who chose each source. Columns will not sum to 100% since respondents could mark multiple sources. The information presented is intended to assist in determining where individuals are most likely to get MWR information, depending upon their status.

USE OF MWR DURING DEPLOYMENT

Frequency of MWR Use during Deployment

Active duty Soldiers who deployed during the past 12 months and spouses of these active duty Soldiers were asked about the frequency with which they used MWR programs in theater or at their home installation during the active duty Soldier's deployment. Exhibit 2-26 shows the percentages for four categories of frequency of use for the two patron groups.

Exhibit 2-26
Frequency of Use of MWR Programs during Deployment

ARMY COMMUNITY SERVICE

ACS Program Use

Survey respondents were presented with a list of Army Community Service (ACS) programs and services and were asked to respond to two questions. First, respondents were asked to indicate if they were aware of the existence of the ACS program at their installation. Second, if they had used the program, respondents were asked to indicate if they found the services to be beneficial or not beneficial. Exhibit 2-28, spanning the following three pages, presents the results of these questions for all respondents and for active duty, spouses, civilians, and retirees. The percentage of respondents who were aware of the program is based on the total number of survey respondents in the patron group, found next to the patron group name. Because respondents were asked to mark whether each program was beneficial only if they had used it, the total number of respondents who answered that question (presented in the column marked “Total Users”) is likely to be less than the number of respondents in that patron group.

CHILD AND YOUTH SERVICES

Preferred Child Care and Youth Programs

Exhibit 2-33 shows both the child care and youth programs currently used by respondents and the child care and youth programs respondents would prefer to use. Data are presented separately for each patron group and for the total of all respondents, shown in the columns labeled "Total Cases." Percentages may not equal 100% because respondents could mark all that applied.

CHILD AND YOUTH SERVICES

Positive Impacts of Army Child and Youth Services

Survey respondents were asked to what extent do Army Child and Youth Services programs positively affect various aspects of their life or the life of their spouse. Responses for active duty members are displayed in Exhibit 2-34. Spouse responses are displayed on the following page. The sum of all responses for each item is displayed in the "Total Cases" column.

BETTER OPPORTUNITIES FOR SINGLE SOLDIERS (BOSS)

Chain of Command Support for BOSS Program

Exhibits 2-35, 2-36, and 2-37 display data from survey questions about the Better Opportunities for Single Soldiers (BOSS) Program offered on the respondent's installation. Participants were asked to indicate the levels of their chain of command that support their installation's BOSS program, which is shown in Exhibit 2-35 for junior and senior enlisted personnel and officers, as well as for total respondents. Percentages will not add to 100% because respondents could mark all levels of the chain of command that support their BOSS program.

Exhibit 2-35

Total	44%	41%	41%	50%	64

BOSS

BOSS Participation Information

Exhibit 2-36 presents the types of BOSS events respondents participate in, and how frequently they participate. Percentages reflect the frequency of participation in each activity by all BOSS participants combined. The number of respondents participating in each activity is presented in the last column.

Exhibit 2-36

LEISURE ACTIVITIES

Leisure Activity Participation by Patron Group

Survey respondents were asked to indicate how often they participated in a variety of leisure activities. Respondents noted if they participated in these activities primarily on post, off post, or at home (if applicable). Exhibit 2-38 provides the location and frequency of participation by active duty respondents in the 91 activities, which are divided by activity category. Exhibits 2-39, 2-40, and 2-41 provide the same data for spouses, civilians, and retirees, respectively. Activities that did not have a response option for participation at home will show "N/A" in the "Participated at Home" column.

INSTALLATION SPECIFIC PROGRAMS/FACILITIES

Satisfaction Ratings of Installation Specific Programs and Facilities

The following exhibits present information on perceptions of quality of and satisfaction with those facilities specific to this installation. Respondents were asked for their assessments of the quality of the buildings or facilities, the quality of the equipment and facility furnishings, the quality of the personnel providing the programs or services, and their overall rankings of quality and satisfaction.

Exhibit 2-42 shows respondent ratings of their satisfaction with select installation facilities. Note that only those respondents who indicated that they had used the facility were asked to provide satisfaction ratings. The number and percentage of respondents who gave each rating are presented for the total group of respondents. The last column on the right presents a mean score rating for each facility. The mean score rating was calculated by assigning a number to each rating, 5 = very satisfied through 1 = very dissatisfied, and taking an average of the ratings across all respondents.

INSTALLATION SPECIFIC PROGRAMS/FACILITIES

Quality Ratings of Installation Specific Programs and Facilities

Exhibit 2-43 presents respondent ratings of the quality of the building/facility/space for select installation facilities. Only those respondents who said they had used the facility rated the quality of its building and space. The number and percentage of respondents who gave each rating are presented for the total group of respondents. The last column on the right presents a mean score rating for each facility. The mean score rating was calculated by assigning a number to each rating, 5 = very good through 1 = very poor, and taking an average of the ratings across all respondents.

INSTALLATION SPECIFIC QUESTIONS

Each installation that participated in the Leisure Needs Survey was provided the opportunity to include five additional questions on items of particular interest to their MWR programs and/or installation. This exhibit shows the responses for these questions by patron group. The number of respondents in each patron group is provided as well as the percent they represent of the patron group respondents. A total, representing all patron group respondents, is found in the far right column. If the question allowed multiple responses (more than one answer could be selected), columns will not add up to 100%. If your installation chose not to include any tailored questions, no information is presented.

Exhibit 2-47 Installation Specific Questions (Survey Questions 61 through 65)

61. If offered at Fort Campbell, which of the following would you most likely visit regularly?

	Active Duty	Spouses	Civilians	Retirees	Total Cases
	(n = 100)	(n = 158)	(n = 129)	(n = 87)	(n = 474)

SECTION THREE MWR FACILITY ANALYSIS

INTRODUCTION TO MWR FACILITY ANALYSIS

The MWR Facility Analysis section of the Leisure Needs Survey Report includes three main components:

- Rankings of all installation facilities by overall usage rates, overall quality ratings, and overall satisfaction ratings
- A facility evaluation worksheet for each facility that provides information by patron group on usage, satisfaction, and quality
- A customer profile worksheet for each facility that provides a demographic overview of those respondents who used the facility.

FACILITY RANKINGS ON USAGE, SATISFACTION, AND QUALITY

- **Installation Facility Usage Rates (Exhibit 3-1)** presents in decreasing rank order the usage rates for each facility on the installation, along with each facility's overall satisfaction rating and overall quality rating. The usage rates for each facility for the Army overall are presented for comparison.
- **Installation Facility Satisfaction Ratings (Exhibit 3-2)** presents in decreasing rank order each facility's overall satisfaction rating, along with each facility's usage rate and overall quality rating. The satisfaction ratings for each facility for the Army overall are presented for comparison.
- **Installation Facility Quality Ratings (Exhibit 3-3)** presents in decreasing rank order each facility's overall quality rating, along with each facility's usage rate and overall satisfaction rating. The quality ratings for each facility for the Army overall are presented for comparison.

Exhibit 3-1: Installation Facility Usage Rates, with Satisfaction and Quality Ratings

Facilities Ordered from High to Low by Usage Rates

Facility	Usage Rates		Satisfaction	
	Installation	Army	Ratings	Quality Ratings
Fitness Center/Gym	66.5%	48.3%	4.35	4.24

THE FACILITY ANALYSIS WORKSHEETS

MWR facility users were asked to rate their satisfaction with each MWR facility at their installation. Users were also asked to rate the quality of each MWR facility's building/facility/space, equipment/furnishings, and personnel. These and other results are presented in this section for each of the facilities in two worksheets:

- **Facility Evaluation Worksheet** – This worksheet provides the number and percentage of respondents using the facility, frequency of use, satisfaction with the facility, and mean quality ratings of the facility's building/facility/space, equipment/furnishings and personnel by patron group (active duty, spouse, civilian, retiree).
- **Customer Profile Worksheet** – This worksheet summarizes the demographic characteristics of facility users in terms of rank/grade, gender, age, race, education, marital status and residence.

Presentation of Results

Results for each facility are presented on two pages; the **Facility Evaluation**, located on the first page, and the **Customer Profile**, located on the second page.

The following four pages provide annotated examples of the two facility worksheets. Compare the examples to actual worksheets in your report. This process will facilitate the appropriate application of your data to MWR program decisions.

FACILITY EVALUATION EXAMPLE

WHO RESPONDED...

For each of the population groups surveyed, the number of respondents and the percentage of the overall total respondents that they represent are given in the row labeled **Total Respondents**. The total number of respondents for all groups appears in the column labeled **Total Cases**. For active duty, 707 is 41% of the total participants, noted in the **Total Cases** column.

HOW MANY USED...

In this section are responses to the question about use of the **Fitness Center/Gymnasium** during the past year. For active duty, 397 or 56% of all active duty respondents (707), used the **Fitness Center/Gymnasium** (see **Used Past Year**).

NOTE: All data reported below this section are based on the responses of only those respondents who **used the Fitness Center/Gymnasium** last year.

HOW OFTEN USED...

Under **Frequency of Use**, information is presented on how often individuals used the facility last year. Of the 397 active duty who used the **Fitness Center/Gymnasium**, 17% used the facility less than once a month, 30% used the **Fitness Center/Gymnasium** 1-3 times a month and 52% used the **Fitness Center/Gymnasium** 4 or more times a month.

	3.97				

PERCEPTIONS ABOUT QUALITY OF FACILITY...

Information about the quality of installation facilities was ascertained by asking individuals who indicated they had used the facility to rate the quality of three components of the facility: building/facility/space, equipment/furnishings, and personnel. Users were instructed to rate the quality of each component on a 5-point scale with 1 representing very poor quality and 5 representing very good quality. The average ratings for the three components are presented in the **Mean Quality Ratings by Users** chart. The average (or mean) of the ratings given by active duty who used the **Fitness Center/Gymnasium** for the building/facility/space is 3.80. The average for both **Equipment/Furnishings** and **Personnel** is 3.82. An average quality rating, 3.82, shown in the row labeled **Overall Quality Rating**, is computed on the total number of active duty respondents who rated any quality component.

Average quality ratings given by respondents from all four patron groups are presented in the far right column under **Total Cases**.

SATISFACTION WITH THE FACILITY...

This section shows how satisfied **Fitness Center/Gymnasium** users are with the facility. Of the 397 active duty respondents who used the **Fitness Center/Gymnasium** in the past year, 88% were satisfied to some degree with the facility. Users were instructed to rate their overall satisfaction of each facility on a 5-point scale with 1 representing very low satisfaction and 5 representing very high satisfaction.

The average ratings for overall satisfaction are presented in the **Mean User Satisfaction** chart. The average (or mean) satisfaction rating given by active duty who used the **Fitness Center/Gymnasium** is 3.97.

CUSTOMER PROFILE EXAMPLE

Fitness Center/Gymnasium (Page 2 of 2) Customer Profile

Active Duty Ranks	Total N = 707	Users Only n = 397
E1-E4	44%	35%
E5-E9	46%	53%
WO-CW5	0%	1%
O1-O3	8%	10%
O4-O10	2%	2%
Total	100%	100%
Civilian Groups	N = 329	n = 57
GS9 or below	59%	67%

Contractor	0%	0%
Total	100%	100%

WHO USED....

The **Customer Profile** describes the characteristics of all survey respondents (Total) and those individuals who used the **Fitness Center/Gymnasium (Users Only)**.

RANK AND GRADE....

Active Duty Ranks is the first category on the left side of the page. The majority of active duty who used the **Fitness Center/ Gymnasium** are enlisted (88%), with more than half of these being senior enlisted (E5-E9).

In the **Civilian Groups** category, the majority of civilians who used the **Fitness Center/Gymnasium** are GS9 or below (67%).

Gender	N = 1692	n = 574
Male	64%	68%
Female	36%	32%
Total	100%	100%
Age Groups	N = 1712	n = 573
21 and Under	13%	13%
22-29	20%	31%
30-38	27%	36%
39-49	17%	14%
50+	24%	6%
Total	100%	100%

GENDER AND AGE...

In the **Gender** category, 68% of users of the **Fitness Center/Gymnasium** are male.

Two-thirds (67%) of users are between the ages of 22 and 38 years of age (see **Age Groups**).

CUSTOMER PROFILE EXAMPLE

Fitness Center/Gymnasium (Page 2 of 2) Continued

Customer Profile

WHO USED....

The **Racial/Ethnic Origin** category shows that half of **Fitness Center/Gymnasium** users are White; one-third are Black/African American. Almost half (48%) who use the **Fitness Center/Gymnasium** have completed some college (see **Education**). Over three-fourths of **Fitness Center/Gymnasium** users are married, with over half being married with children as indicated under **Marital Status**. The majority of **Fitness Center/Gymnasium** users live off post (see **Residence**).

NOTE: Demographic data presented under the column labeled **Users Only** provide a profile of those individuals who used the **Fitness Center/Gymnasium** within the last twelve months, whereas data presented under the column labeled **Total** represent all survey respondents. Comparisons between these two groups can assist you in determining who is most likely to use the facility, but comparisons must be screened for appropriateness. For example, the proportion of respondents 50+ years old in the **Total** sample is 24%. In this example, however, only 6% of the users are 50+ years old, which is a more realistic number for **Fitness Center/Gymnasium** use.

SECTION FOUR MWR ACTIVITY ANALYSIS

INTRODUCTION TO MWR ACTIVITY ANALYSIS

The information in this section is based on responses to questions about social and recreational activities (Questions 52-54) on the 2005 Leisure Needs Survey. This introduction provides instructions on how to interpret the survey results.

Presentation of Results

All exhibit pages are presented in the same format and each contains the results for one activity. The numbers of active duty, spouses, civilians, and retirees who participated in the activity in the past year, whether on post, off post, or at home (if applicable), are indicated at the top of each page. Frequency of participation, as well as the rank and residence of participants, is presented for those who participated in the activity primarily on post, for those who participated primarily off post and for those who participated primarily at home. The percentages for those subgroups that participate in the activity may not sum to the overall participation percentage due to rounding. Please follow the annotated example on the following pages to familiarize yourself with the presentation of these activity data.

Use of the Data

By comparing results across activities, the recreational interests and preferences of different patron groups can be determined. The demographic information offers a description of those individuals who participated in the specified activity. Use of this information can be helpful in program planning and in identifying activities preferred by patron groups.

THE EXAMPLE BEGINS ON THE NEXT PAGE →

ACTIVITY WORKSHEET EXAMPLE

SPECIAL INTEREST

AUTOMOTIVE BODY & PAINTING

	Active Duty (n = 1444)	Spouses (n = 634)	Civilians (n = 1070)	Retirees (n = 816)	Total Cases (n = 3964)
OVERALL PARTICIPATION	29%	WHO PARTICIPATED... The percentage of respondents in each patron group who participated in the activity primarily on post, off post or at home in the past year are shown in the row labeled Overall Participation . The total number and percentage of respondents for all groups who participated in the activity appears in the column labeled Total Cases .			
DID NOT PARTICIPATE PAST YEAR	71%				
PARTICIPATED PRIMARILY ON POST	50%				
Less Than Once a Month	61%				
1-3 Times A Month	27%	PARTICIPATION PRIMARILY ON POST/OFF POST/AT HOME... Information is presented on how often individuals participated in an activity primarily on or off post. Information on how often individuals participated in an activity primarily at home is presented only for Special Interest activities. Special Interest activities will therefore have two-page worksheets, with information on at home participation on the second page, whereas all other activities will have one-page worksheets. Respondents may have participated on post, off post and at home (if applicable), but were asked to designate only where they primarily participated. 50% of active duty respondents participated in Automotive Body & Painting primarily on post, whereas 34% participated primarily off post. As can be seen on the second worksheet page, 17% of active duty respondents participated in Automotive Body & Painting primarily at home.			
4 + Times A Month	12%				
Total Participants	100%				
Participants' Rank					
E1-E4	34%	RANK/RESIDENCE... Rank and residence data are provided for individuals who participate primarily on post, off post and at home (if applicable). The majority of active duty respondents who participated primarily on post are senior enlisted (47%); off post participants are mostly junior enlisted (44%). The majority of individuals who participated primarily at home are junior enlisted (53%). These percentages apply only to those individuals participating in the activity and do not apply to the overall population.			
E5-E9	47%				
O1-O3, WO1-CW5	8%				
O4-O10	11%				
Participants' Residence
